

London Structural Biology Club

3 pm, Tuesday 29 July 2008

'The interactome of the chaperonin CCT'

Carien Dekker

Institute of Cancer Research, London

'Deubiquitination during cytokine signalling'

David Komander

MRC Laboratory of Molecular Biology, Cambridge

'Fibre formation across the bacterial outer membrane by the chaperone/usheer pathway'

Han Remaut

School of Crystallography, Birkbeck College, London

'Structural basis of sequence-specific collagen recognition by SPARC'

Erhard Hohenester

Division of Cell & Molecular Biology, Imperial College

Time: 3-5pm

Followed by Pizza & refreshments

Location: Lecture Theatre B34, Birkbeck, Malet Street

All are welcome

This meeting is kindly sponsored by  **alpha laboratories**
supplying quality to science
