

London Structural Biology Club

'Everything flows - motion and function'

3 pm, Tuesday 27 February 2007

What can we understand from jiggings and wiggings of atoms?

Franca Fraternali

King's College London

Dynamics of the 55-kDa troponin complex as seen by NMR

Tharin Blumenschein

Imperial College London

Helicases: sensing movement along DNA

Martin Webb

MRC National Institute for Medical Research

Structural basis of the MCM helicase activity

Alessandro Costa

Imperial College London

Presentations run from 3-5pm

Followed by Pizza & refreshments

Venue: Clore Lecture Theatre, Birkbeck, Malet St

All are welcome
